

# WEBSITE REVIEW & FEEDBACK MEMO

Executive Summary Client: Royal Best Pharmaceuticals Pvt. Ltd.

Agency: Techno Mantra

Date: October 6, 2026

Subject: Technical & Business Alignment Revisions for Website Prototype

---

We reviewed the website presentation and identified 5 key gaps. The website must be revised to reflect our complete product catalog, third-party manufacturing services, steroid product focus, and B2B sourcing capabilities.

---

## Key Action Items & Revisions

### 1. Add Third-Party / Contract Manufacturing Page (High Priority)

- **Gap:** Our Third-Party Formulation Contract Manufacturing in **Baddi (Himachal Pradesh)** and **Maharashtra** is completely missing.
- **Action:** Create a dedicated top-navigation page titled "**Third-Party & Contract Manufacturing**". Highlight supported dosage forms (Tablets, Capsules, Injectables, Ointments, Liquids) and WHO-GMP standards.

### 2. Create Dedicated Category for Steroids & Steroidal Intermediates

- **Gap:** Steroids and Corticosteroids (e.g., Betamethasone, Prednisolone, Hydrocortisone) are hidden under general headings.
- **Action:** Add a specialized sub-category under Products named "**Steroidal APIs & Corticosteroids**".

### 3. Clear Positioning as an API Trader & Global Sourcing Partner

- **Gap:** The website implies self-owned manufacturing plants instead of our trading model.
- **Action:** Position Royal Best as a premier **API Trader, Exporter & Global Sourcing Partner**. Emphasize our global supply chain, quality audits, and regulatory documentation (COA, MSDS, DMF).

### 4. Full Alignment with DGB Master Product Catalogue (2026 Edition)

- **Gap:** Missing full product structure, HSN codes, and search functionality.

- **Action:**
  - Structure products into 5 categories: **180+ APIs, 50+ Sterile Compounds, 50+ Intermediates/KSMs, 25+ Culture Media Plates, and Excipients.**
  - Display **CAS Number, HSN Code, and Therapeutic Category** for every product.
  - Add a live **Search & Filter Bar** (search by Chemical Name, CAS Number, HSN Code).

## 5. Add "Request for Quote" (RFQ) & Download Catalog CTA

- **Gap:** B2B buyers have no direct way to request quotes or download our catalog.
- **Action:** Add an **"Instant RFQ / Sample Request"** button on each product page and a **"Download Master Catalog (PDF)"** link on the main navigation.
